THESIS ABSTRACT

Title : Management Information System for Metro-Dagupan Colleges

Researchers : Edwin Cabrera Biasbas and Allan Paul de Leon Aquino

Degree : Bachelor of Science in Computer Science

School : Metro-Dagupan Colleges

School Year : 2010 - 2011

Adviser : Mr. Ian Jefferson Vargas

The manual recording of students' personal information and registrations and assessment of students' tuition fees which give us the interest to come up into study of having a proposed web-based automated system which may help in the easy way of saving, tracking and retrieving of records.

The growth of modern technologies such as the advancement of hardware facilities, the on-line transmission of data from computer to computers through the Local Area Networking (LAN) or the Wide Area Networking (WAN) using wired / wireless communication technologies.

The proposed development of an on-line system which is named as **THE MANAGEMENT INFORMATION SYSTEM FOR METRO DAGUPAN**

Metro Dagupan Colleges Library

COLLEGES or THE MIS4MDC PROJECT. In this proposed system, the very aim is to register and to easily identify any individual enrolled or employed in this school. The composition of the automated system which includes assessment of fees, registration of subjects, schedules of students/employees, payroll, eDirectory (online directory) and campus eMap.
